

ESP32 host architecture

User interfaces

WebShell | Lua scheduler | HTTP/WebSocket | LLM

Host services

cluster_vfs | RPC client | Job manager | observability

Mesh coordination

coordinator | sessions | routes | leases

Host collaboration

mDNS | election | topology | time.exchange

UART plane

Link Frame v2 + Mesh2

IP plane

TCP/9909 + bounded CBOR

One process joins two network planes without tunneling raw UART frames.
